PROVEN DATA

Managed Detection & Response

A proven MDR provider to protect against any modern cyber threat

Comprehensive Protection Services

Centralized security platform: this allows for simple agent management, threat zone containment workflows, and compliance policy application.

24/7/365 threat hunting: if any minor incident occurs, Proven Data's seasoned security analysts are available round-the-clock to investigate and patch against live threats.

Data breach warranty: we cover up to $1 million in response expenses, ensuring that you have the necessary financial support to address any breach incident effectively.

$1,000,000 breach warranty

Why choose Proven Data

Proven Data embeds cybersecurity veterans within your tech stack for 24/7 defense and real-time threat elimination. We work with continuous controls that integrate with existing infrastructure, alleviating resource drain while enabling agile security postures tailored to strategic business priorities.

DETECT
We continuosly monitor your environment's assets for risks using your existing tech stack, leveraging broad data collection and seasoned expertise to catch advanced threats that could otherwise slip through the cracks.

RESPOND
We promptly investigate and contain suspicious cyber activity using managed monitoring and response, searching retained logs if deeper analysis is required, preventing incidents from spreading.

RECOVER
Through guided remediation and root cause analysis of incidents paired with regular security reviews, we create customized solutions that continuously improve protection of your unique environment.
